

ANGLER EDITION

"BUILT BY OWNERS, FOR OWNERS, WHEN QUALITY & PERFORMANCE COUNTS"

The unique configuration of the 240 BaD Cat is a symmetrical hull was designed to capture air like a racing catamaran resulting in a vertical lift. It still has the razor-sharp entry point to slice through a nasty chop keeping you dry while providing better performance, better handling, resulting in a smoother, and comfortable ride. Our resin vacuum infusion system delivers a substantial reduction in weight, providing better fuel efficiency, a tougher, stronger, and more robust composite structure. The close-molded resin Infusion process allows for more precision and a cleaner and safer environment.

SUZUKI OUTBOARD OPTIONS: (** Required Performance Package)	Custom Build:	Factory Direct:
